Inquiry into Energy Policy and Planning in Wales

EPP 100 – Cllr E A Jones

I believe that the Energy and Planning Policy (TAN 8) in Wales is flawed and requires a total review.

The proposed construction of the Wind Farms in Mid Wales will destroy the local economy and the environment ie house prices, schools, roads and bridges , health, visual effects the list is endless.

There are other forms of energy that could be considered, solar, digesters and even the Severn Barrage that could produce as much energy that Wales requires in one site and where the infrastructure to distribute the power is in place.

Please, please take note now and don't destroy Mid Wales for ever.

Cllr. E A Jones
