

Teachers' perspectives on the development of Curriculum for Wales

Dr Nigel Newton
WISERD, Cardiff University
newtonn2@Cardiff.ac.uk

Sample

- Semi-structured interviews: 10 Pioneer Leads (AoLE) and 25 teachers in 10 schools (primary and secondary, Welsh and English medium) serving the more economically disadvantaged communities.
- A survey was developed to be administered to all teaching staff within Pioneer Schools nationally: distinguishing levels of involvement in 'Pioneer' work & role in school (e.g. SMT & classroom teachers).
- Survey data were collected from 634 teachers across 81 Pioneer Schools.

How well informed do you feel about the new curriculum?

- 93% of Pioneer Leads said they were considerably informed. This figure drops to 39% for teachers in Pioneer schools who as yet had no specific role or involvement in curriculum development.

Are you familiar with the 'What Matters' statements?

- No specific involvement - 48% No, 52% Yes

Are you happy with the current content of the What Matters statement in your AOLE? (only if familiar with them) Response categories: Yes, Somewhat, Unsure, No.

- For all except Pioneer Leads, there were more 'somewhat' happy than simply happy. 17% who are involved but not Pioneer Leads were unsure or unhappy; 26% who are not involved at all are unsure or unhappy.

What do teachers think about more specific aspects of changes (subject specific knowledge, adaptation to teaching, AoLE teaching, teacher choice)?

- There is a significant group of teachers (ranging from 41% - 24%) who are unsure or have negative perspectives on the benefits of the new curriculum to their pupils and experience of teaching.

'Mindset' change

"It's a difficult one because it's change your mindset more than resources."

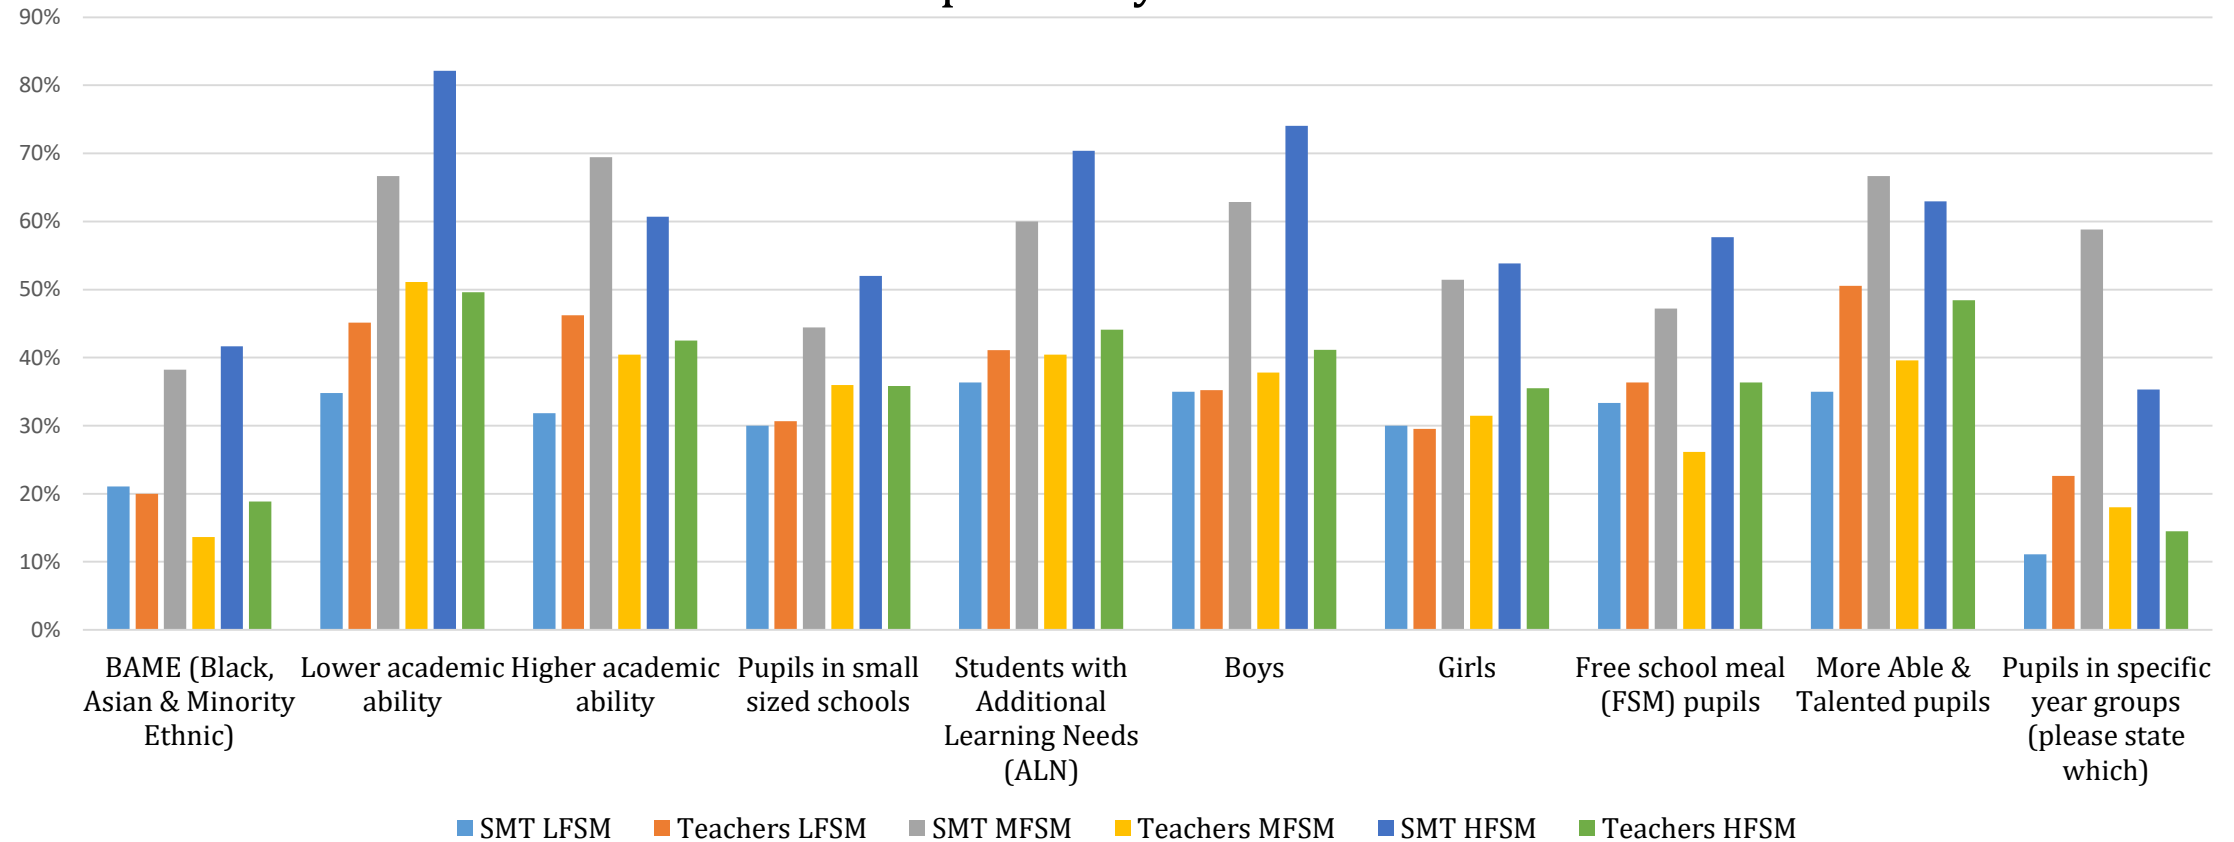

"I think a lot of heads will need to become far more creative and change their mindsets, look at the curriculum design issue. It's not going to be a box ticking exercise thank god, we've had that. This has got to be a lot more evolved and it's got to be a change of mindset."

"Have they got the skills to do those things because we've never taught in that particular way and you can't just suddenly change the mindset of a profession that's almost going to take a generation to re-educate that profession to do things differently."

Which, if any, of the following groups of pupils do you think could be affected (positively) by the introduction of the new curriculum? % of whole sample

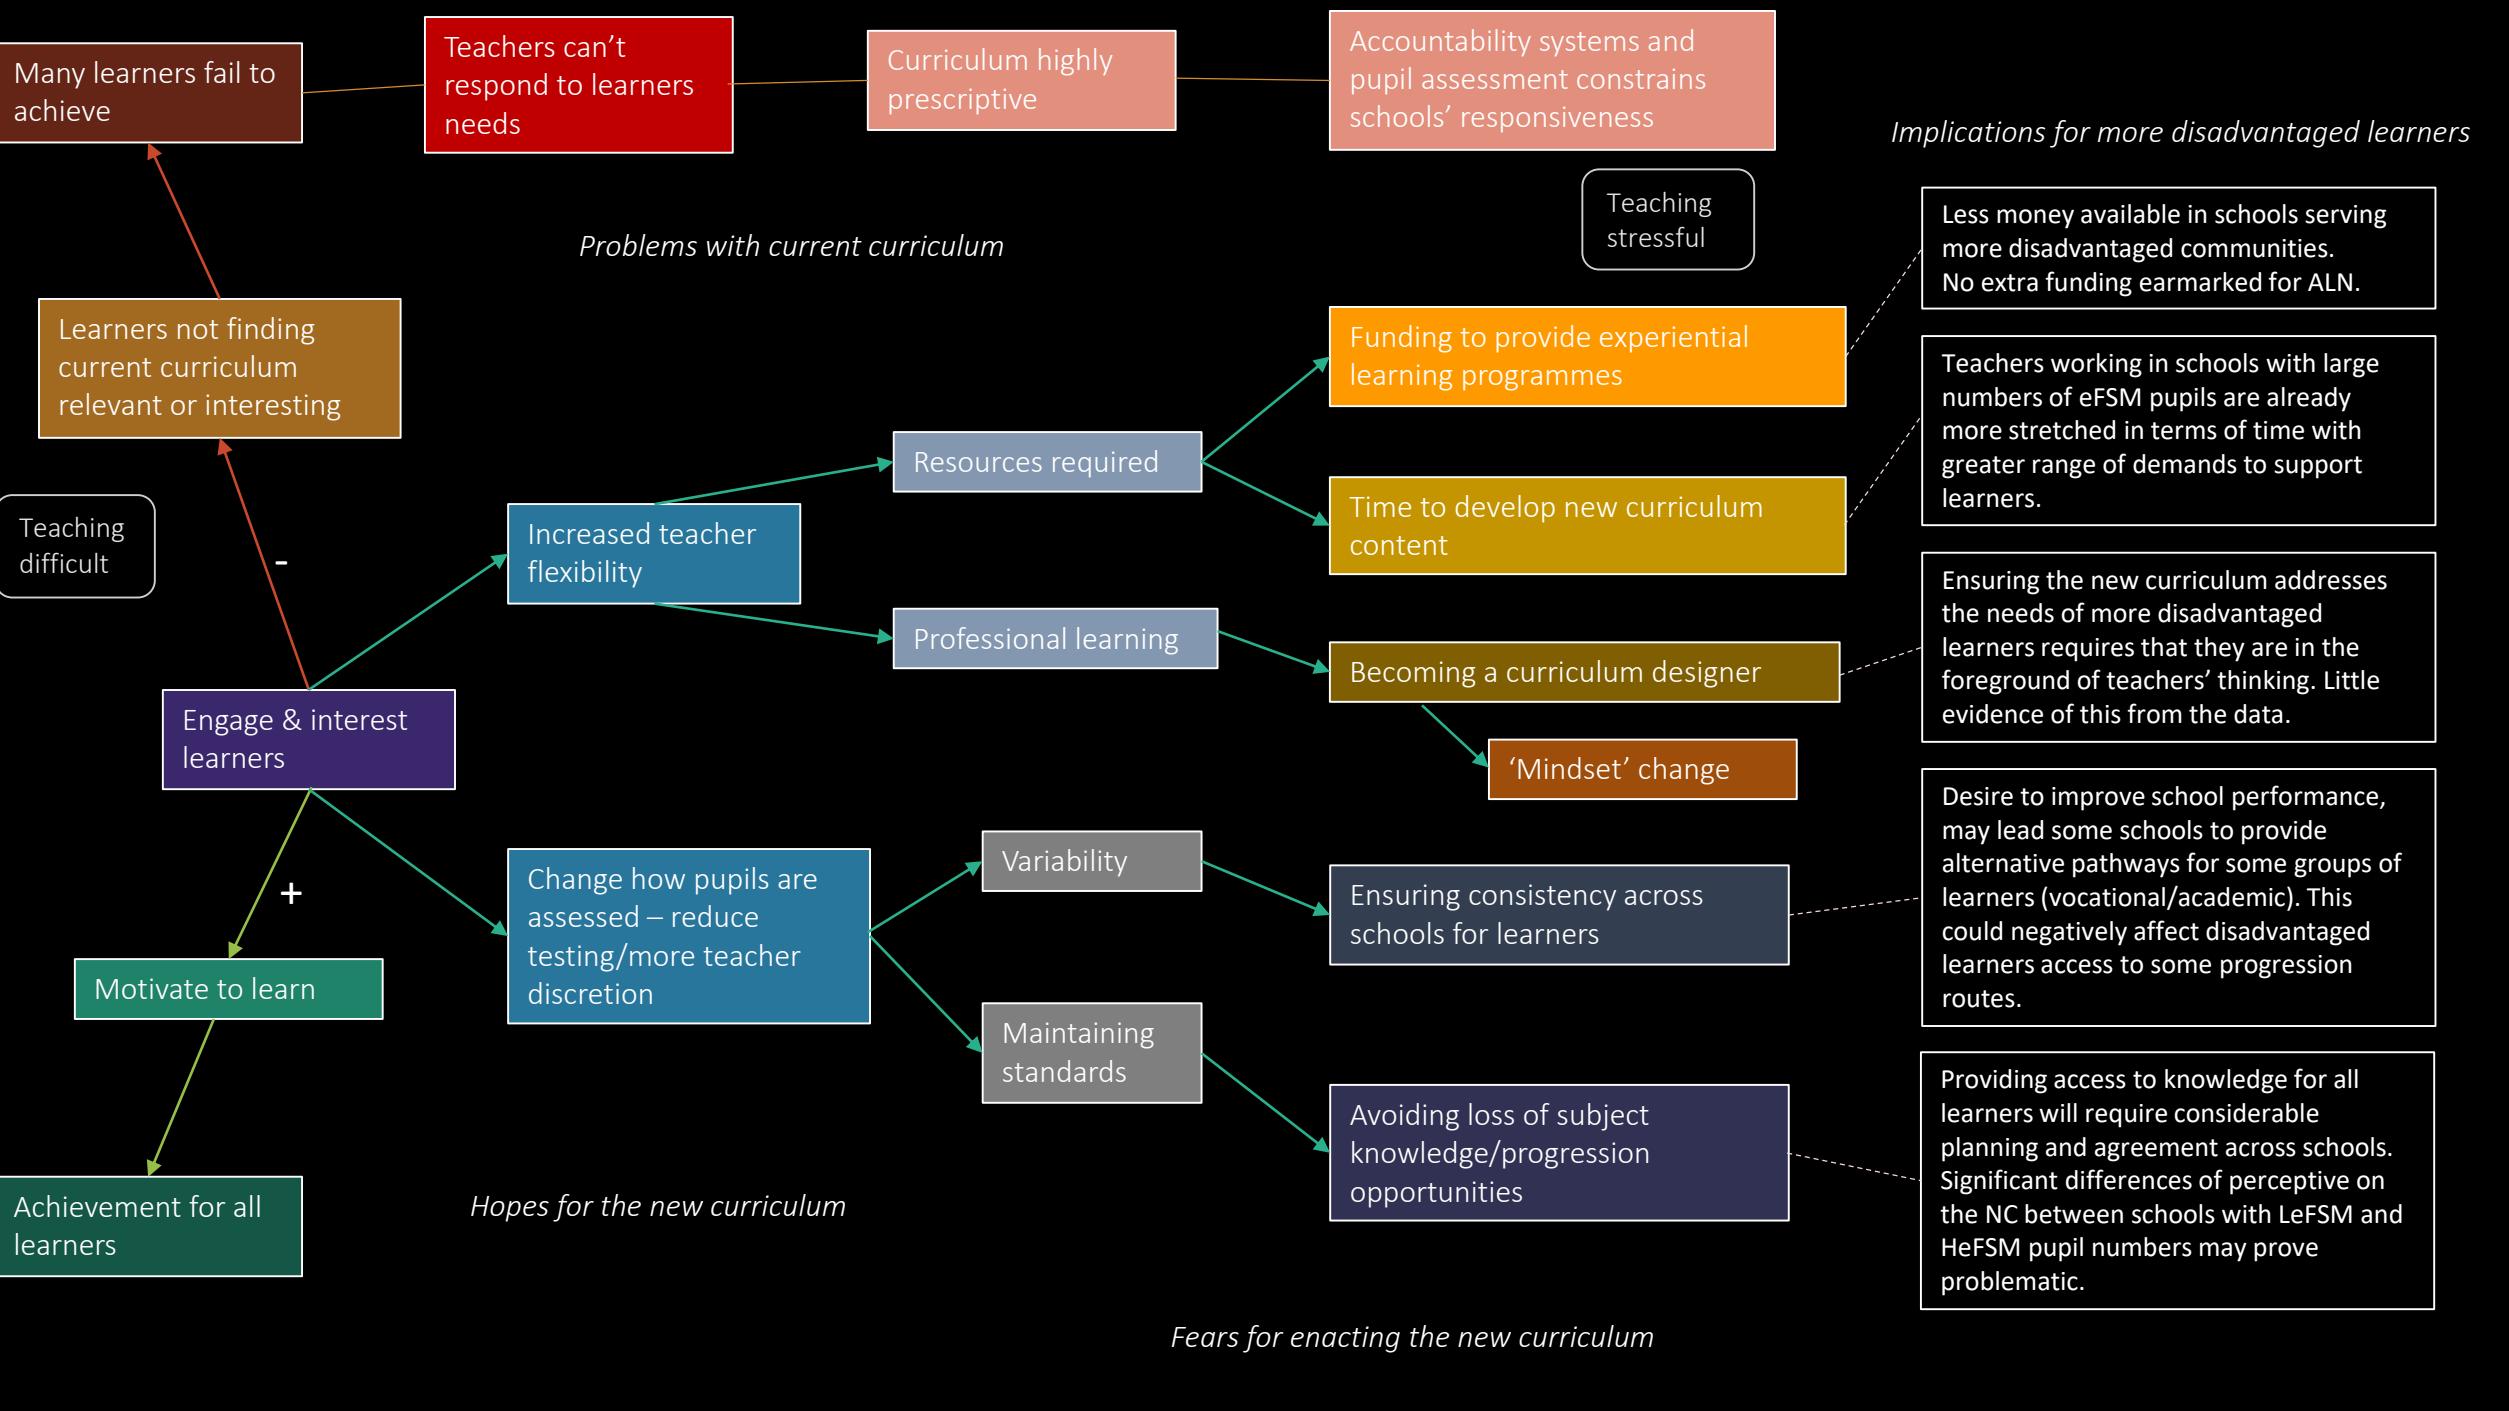

Which, if any, of the following groups of pupils do you think could be affected
by the introduction of the new curriculum?
% positively indicated

Tensions within hopes & fears

- School & teacher flexibility
- Changes to assessment in keeping with the reforms
- Benefits of a broader curriculum that is more child-centred
- Avoiding variability across schools
- Successful progression to post-16 study and employment
- Ensuring pupils don't miss out on subject specific knowledge

Implementation of reform for Success

Sinnema, Claire (2011) *Monitoring and Evaluating Curriculum Implementation: Final Evaluation Report on the Implementation of The New Zealand Curriculum 2008-2009*. Ministry of Education, New Zealand

How might learners from more disadvantaged backgrounds be affected by the new curriculum?

- School practices contributing to the attainment gap between learners from more and less advantaged backgrounds:
 - Lower quality teaching (less qualified teachers), ability grouping, undermined confidence, less access to a broad curriculum and fewer out-of-school educational experiences¹.
- What doesn't help:
 - Adopting new curricula does not, in general, produce large improvements in learning outcomes; use of ICT (e.g. individualised, self-instructional programmes) has minimal impact on attainment for children living in poverty³
- Factors that contribute to narrowing the gap:
 - Rigorous monitoring and use of data; raising pupil aspirations using engagement/aspiration programmes; engaging parents; developing social and emotional competencies; supporting school transitions; providing strong and visionary leadership; high quality teaching; an inclusive curriculum².
 - Good pedagogy supported by high quality professional development; whole-school reform models, which address multiple elements of school provision; use of coaching teachers/assistants in evidence-based approaches include cooperative learning (structured groupwork), frequent assessment and 'learning to learn' strategies³.

Aims

- Four purposes
- Raising attainment
- Employability (Wales PLC)

Content

- AoLEs
- 'What matters'
- Progression Steps
- An evolving and inconsistent process
- Expectations about high levels of teacher autonomy

Pedagogy

- 12 pedagogical principles
- Considerable variation and experimentation
- Will be influenced by decisions about assessment

Assessment

- The unknown
- High levels of hope that current assessment system will be changed.
